what is life to stupid, toiling drudges like them ?"

A terrible smile passed over his face as he the canister. Only a light to the powder and the rocks above would be riven, and with a might burst the sea would rush in and overwhelm them all ! He took out his knife and proceeded to open the lid of the eanister, which, by some means, had been fastened

down too tightly. But, bark! Close beside him, just beyond the ending of the path, he heard a rustling. crackling sound; then a crash, and a huge fragment of rock rolled down and he was only just in time to leap aside before the place where he had stood was covered with shivered portions of it as it descended, and, leaping from ledge to ledge, at last, with sudder roar, was lost in the depth below. Still he listened, for another and more dreadful sound caught his ear-the low, swishing sound of falling water. He crept as near as he could along the pathway, and as he did so his face was sprinkled with the cold sprays of the turrent. He held out his hand, and then, touching his lip, tasted the water. It

Just as the basket reached the level of the upper ground, where hundreds were waiting anxiously the arrival of each company that placed the lamp by his side and bent over was saved, a tremendous black cloud rolled up the pit's mouth, bursting up a fearful roar high into mid-air, and when it had cleared away the men peered down the shaft. Far away in the darkness beneath they could hear the dash of the waves, and sometimes thought they could discern their white gleam as they leaped up the sides of the shaft --Jim Massey and several others volunteered to go down and seek for any who might be still struggling in the water. It was too late,

The mine is now deserted and its buildings

Some time after the disaster a part of the cliff above it, probably undermined by the action of the waves, fell down one stormy night, and now there is a great cavern wandering away in dark passages under the cliff where part of the coal mine had been.

It is easy to penetrate beneath these gloomy arches in a boat during fine weather, and many times in after days Agnes, then a happy wife and mother, would come there with her children on summer days and tell them the story of how their father's life had been saved. And when she had ended and leaned back in the boat as they floated on thro' that silent gloom as of the twilight, the large ern of the sea.
